

Surya Teja Katragadda

SENIOR DATA ENGINEER

☎ +44 7393 842326 | ✉ surya.katragadda761@gmail.com | 📱 suryatejakatragadda | 💻 surya-katragadda761 | 📍 Aylesbury, UK

Summary

Senior Data Engineer with 6+ years of experience delivering Python-based automation, large-scale data pipelines, and cloud analytics solutions for enterprise environments. Proven ability to translate complex business requirements into scalable data workflows, improve data quality, and drive operational efficiency across high-volume datasets. Skilled in Python, SQL, Azure, GCP, Power BI, and modern data engineering practices including ETL/ELT, data modelling, RCA, and impact analysis. Experienced in collaborating with cross-functional engineering, operations, and planning teams to deliver analytical solutions that support decision-making and streamline business processes. Strong background in UAT planning, stakeholder management, and end-to-end delivery of data-driven improvements. Based in Aylesbury with full right to work in the UK.

Work Experience

Tata Consultancy Services (TCS)

Aylesbury, UK

SENIOR DATA ENGINEER

Jan. 2024 – Present

- Acted as the primary interface between business stakeholders and technical delivery teams, owning requirements gathering, solution design, process improvement, and operational reporting for a major enterprise client.
- Built Python-based automation systems that improved operational data processing and reduced turnaround time across engineering teams.
- Fine-tuned GPT models on custom CSV datasets to improve accuracy for domain-specific text classification.
- Collaborated with cross-functional groups including operations, planning, and management to translate requirements into scalable data solutions.
- Identified a recurring operational bottleneck and proposed an automated Python-based solution (Quick Win tool); partnered with engineering teams to deliver and roll out the tool, now used daily across the business.
- Conducted root cause analysis on data quality issues, mapped impacted processes, and coordinated cross-functional delivery of fixes including automated detection and reporting tools.
- Ensured data integrity through structured RCA, impact assessments, and continuous process improvement.
- Built and maintained Power BI dashboards and management information reports for senior stakeholders, enabling data-driven visibility of KPIs and project status.
- Facilitated workshops and working sessions with clients and delivery teams to review requirements, assess change impact, and align priorities.

Tata Consultancy Services (TCS)

Hyderabad, India (Supporting UK Operations)

BUSINESS ANALYST

Jul. 2019 – Dec. 2023

- Provided business analysis and data support to UK-based planning and operations teams on a large-scale national infrastructure programme.
- Engaged directly with UK client stakeholders to capture and document business requirements, agree process changes, and translate them into functional specifications.
- Identified a gap in an operational process and implemented a new approach that enabled the business to serve previously missed customers, contributing to programme targets.
- Mapped and analysed end-to-end business processes to identify inefficiencies, support SLA management, and drive continuous improvement.
- Developed SQL queries, stored procedures, and PL/SQL packages to automate data extraction, reporting, and order lifecycle tracking.
- Produced management information packs and ad hoc analysis for leadership, providing programme-level insights for decision-making.
- Coordinated task progression across multiple teams, managing dependencies and resolving issues to keep order lifecycles on track within SLAs.
- Participated in client review meetings to define process requirements, capture change requests, and communicate progress.

Education

Jawaharlal Nehru Technological University (JNTU)

India

MASTER OF COMPUTER APPLICATIONS (MCA)

June 2016 – March 2019

- Completed advanced coursework in Computer Science, Software Engineering, and Data Systems.

Krishna University

India

BACHELOR OF COMPUTER SCIENCE

June 2013 – March 2016

- Focused on programming fundamentals, databases, and computer applications.

Technical Skills

Data Engineering	ETL/ELT pipelines, data modelling, high-volume data processing, workflow automation
GenAI & LLMs	RAG pipelines, fine-tuning, LLM integration, AI agent workflows
Programming	Python (Pandas, NumPy, Matplotlib, Seaborn, Selenium), SQL, PL/SQL
Data Analysis	Python-based analytics, SQL analysis, Root Cause Analysis, Impact Analysis
Data Visualisation	Power BI dashboards, KPI reporting, Excel (Advanced)
Databases	Oracle, MySQL, SQL Server, GCP BigQuery; stored procedures, query optimisation
Cloud Platforms	Microsoft Azure (DP-900 Certified), Google Cloud Platform
Core Competencies	Python Automation, Stakeholder Management, UAT Planning, Defect Management
Tools & Environments	Git, VS Code, Toad, Oracle SQL Developer, MS Office Suite, PuTTY
Methodologies	Agile, Waterfall, RCA, Impact Analysis, UAT, stakeholder communication

Awards & Recognition

Service and Commitment Award, Recognised by Tata Consultancy Services for outstanding dedication and contribution

Star of the Month Award, Awarded for Best Individual Performance and exceptional delivery

Best Team Award, Honoured for Team Excellence and collaborative achievement

Certifications

Microsoft Certified: Azure Data Fundamentals (DP-900), Microsoft

Certified Python Developer, NPTEL – IIT

CISCO Routing and Switching, Cisco Networking
